

FAST FACTS

EA2185 - Comparing the Clinical Impact of Pancreatic Cyst Surveillance Programs

Eligibility Criteria

1. Patients must be age ≥ 50 years and ≤ 75 years
2. Patients must have an ECOG Performance Status 0-1.
3. Patient must not have acute pancreatitis or a history of chronic pancreatitis
4. Patient must have received a CT or MRI within 3 months of registration that revealed a newly identified ≥ 1 cm pancreatic cyst
5. Women of childbearing potential must not be known to be pregnant.
6. Patient must not have a prior diagnosis of pancreatic cyst or pancreatic malignancy of any type.
7. Patient must not have a history of pancreatic resection.
8. Patient must not have other asymptomatic pancreatic cystic lesion with zero/low malignancy potential (pancreatic pseudocyst, classic serous cystic lesion) on index CT or MRI.
9. Patient must not have a family history of pancreatic adenocarcinoma in 1 or more first degree relatives.
10. Patient must not have pancreatic cyst morphology that would prompt immediate surgical consideration (enhancing mural nodule, solid component in cyst, pancreatic duct >10 mm, cyst causing obstructive jaundice).
11. Patient must not have a comorbid illness that precludes pancreatic cyst resection.
12. Patient must not be participating in an already established surveillance program.
